SPEAKERS & SESSIONS

JAMES LEE WITT, KEYNOTE SPEAKER
Chief Executive Officer, International Code Council
Former Director, Federal Emergency Management Agency
James Lee Witt has been at the forefront of emergency management for over 25 years. As director from 1993-2001, Witt led the Federal Emergency Management Agency through more than 348 Presidential-declared disasters in more than 6,500 counties in all 50 states. In 1996, Witt became the first FEMA head to be elevated to a Cabinet position. Currently, as president of James Lee Witt Associates, Witt provides local governments, corporations, hospitals, universities, and other non-profit organizations with innovative risk mitigation solutions and recovery services. Just released, his book Stronger in the Broken Places: Ten Lessons for Turning Crisis into Triumph is based on a common-sense approach to government and first-hand experience dealing with disasters.

JAMES HAUGHEY, PHD
Chief Economist, Reed Construction Data
A veteran of economic and construction forecasting, Jim Haughey’s extensive experience spans 30 years as a business economist and 20 years of monitoring various construction industries. Reed chief economist, Mr. Haughey will discuss the current economic environment of commercial construction, offer a 2006-2007 forecast of space demands, and address several region-specific trends.

LARRY AYERS
Contracting Officer
US General Services Administration
Simply put, the US General Services Administration is the government’s “landlord,” meeting a multitude of space requirements of the federal government. GSA is also the premier federal acquisition and procurement force, acting as a catalyst for nearly $66 billion in federal spending—more than one-fourth of the government’s total procurement dollars. Contracting officer Larry Ayers will provide an overview of the administration’s multiple award schedule program, key points to consider when submitting an offer, and a “how-to” on marketing the federal customer.

TIM BRETT
Manager, AEC Opportunities, INPUT
According to INPUT’s Tim Brett, the top ten federal architecture, engineering, and construction (AEC) contracts of fiscal years 2006 and 2007 are anticipated to produce more than $44 billion in business opportunities over the next 24 months. Long term contracts for repair, reconstruction, and rehabilitation will occur at government facilities worldwide. For companies large and small, Mr. Brett offers insight on playing a role in these opportunities and evolving government requirements.

MUI ERIKUN
Chief of Staff, Chief Procurement Office
US Department of Homeland Security
Mui Erkun has the most up-to-date information on doing business with the US Department of Homeland Security. Specifically, Mr. Erkun will explain department processes, forecast department contract opportunities, and give advice on tapping enormous amounts of projected Homeland Security money.

ROBERT FAITHFUL, IV
Director, Office of Small & Disadvantaged Business
US Department of the Interior
In 2001, the US Department of Interior led Cabinet-level organizations in the percentage of procurement dollars devoted to small business. It remains a leading Cabinet agency in 8(a) and Small Disadvantaged Business contracting accomplishments. Office director Robert Faithful will discuss procurement assistance for small, small disadvantaged, minority, women-owned, veteran-owned, and service-disabled businesses.

LEE ANNE JILLINGS
Director, Office of Outreach Services and Alliances
Occupational Safety & Health Administration
US Department of Labor
Lee Anne Jillings is responsible for the development and implementation of the Occupational Safety & Health Administration’s national alliance program and coordination of the agency’s compliance assistance activities. MBI joined the OSHA program in 2004. Ms. Jillings will discuss the two organizations’ commitment to providing industry workers and employers with information, guidance, and access to training resources.

HOWARD HOY
Program Manager
US Army Corps of Engineers
US Army construction schedules have become so aggressive that obtaining facilities through the Army’s traditional capital construction program—MILCON—is too time-consuming. Thus, the Army has implemented a fast track approach relying on a combination of modular buildings and renovations to existing buildings. Program manager Howard Moy will provide insight into MILCON transformation including standards, strategies, processes, and timing.

LAURIE ROBERT
Vice President, Sales & Marketing
MRB, Inc. Modular Building Specialists
Laurie Robert has been involved in the modular building industry for over 20 years. She is well-known as an expert on the ins and outs of commercial modular construction. Vice president of sales and marketing for a leading manufacturer of modular buildings, Ms. Robert has also served MBI as a four-term board member, vice president, and president and is a recipient of MBI’s Outstanding Achievement Award. In her session on green building, Ms. Robert will discuss industry trends, principles, and practices.

STEVE TUCKER
Sales Manager, Blazer Industries, Inc.
With over 30 years of experience in manufacturing, construction management, and building design, Steve Tucker is another well-known veteran of commercial modular construction. His technical knowledge and ability to guide clients through the programming and design process have made Blazer Industries, a modular buildings manufacturer, a recognized industry leader. Mr. Tucker has served MBI as a board member and is immediate past president. He will address several fundamentals of green building, including responsible construction, healthier environments, and cost benefits.

DEBBIE WALBERT
Senior Analyst, INPUT
Established in 1974, INPUT helps companies develop federal, state, and local government business. Over 1000 members, including small specialized companies, new entrants to the public sector, and the largest government contractors, rely on INPUT analysts like Debbie Walbert for the latest and most comprehensive market information. For MBI attendees, Ms. Walbert will address, specifically, federal design/build projects.

LEARN FROM FEDERAL GOVERNMENT AND MODULAR CONSTRUCTION EXPERTS AT THIS PREMIERE ANNUAL INDUSTRY EVENT.

If you want to increase your share of federal government dollars, this is the must-attend event of the year! A new annual meeting, MBI’s 2006 Government & Military Construction Conference is the most substantial and impressive industry gathering of agencies and officials ever. Key procurement “movers & shakers” will offer the how-to’s of securing federal construction projects—from disaster relief to military command. Join is in Washington, DC for three ground-breaking days of intensive learning and maximum networking.

- Learn procurement practices that will immediately boost your ROI
- Gain insight into effectively marketing the federal government
- Hear industry leaders explain why green building practices are in such high demand
- Get insight into MILCON transformation and find out how to participate in GSA scheduling
- Network with government officials and industry leaders
